

CARL DC-90N

rolling slicer trimming board

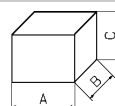

Materials:

- Made in polystyrene, ABS etc.
- illuminated ABS ruler

Technical / functional features:

• Maximum cut (mm):	310 (A4)
• Cutting capacity (80g/sqm):	Straight blade: 5 sheets Perforation blade: 3 sheets
• Straight cut:	yes, with the cutter included in the packaging
• Perforation cut:	yes, with the cutter included in the packaging
• Millimetre ruler:	yes, included
• Colour:	BLACK / GREEN TRANSPARENT
• Weight net/gross (g):	119/157
• Dimensions (cm):	38,5 x 10 x 3,17 h
• Box dimensions (cm):	38,7 x 10,2 x 3,4 h
• No. of pieces per carton:	20 (packed in boxes of 5 pieces)
• Carton dimensions (cm):	43,5 x 36 x 27 (AxBxC)
• Carton weight:	Kg 6,5

Spare parts:

REF.	Description	Pieces per packing
• K 13	Spare cutter - straight cut	1
• K 12	Spare cutter - perforation cut	1

CARL DC-90N rolling slicer trimming board, manufactured by CARL MANUFACTURING CO., LTD. - TOKYO, is distributed in Italy exclusively by **BALMA, CAPODURI & C. s.p.a.**, which assures **a good after-sale service too.**

Descriptive notes: CARL DC-90N, ideal for home, school and office, employs a cutting system based on a rolling slicer moving on an appropriate mat (it is possible to cut also films, fabrics, etc.). The new illuminated ruler helps to better check the sheet position before cutting. The cardboard packaging can be hung vertically.

In addition: it is possible to make either a straight or a perforation cut, as both cutters are supplied with the paper cutter; spare cutters are available.

Safety: CARL DC-90N paper cutter completely matches with the quality standards fixed for machines which must be used, always in maximum safety, in every working place, home, school and office. The practical safety cover avoids any accidental contact with the cutter.

Product Safety (Regulation (EU) 2023/988)

Detailed instructions for use can be found inside each box.

Risks

- Do not place fingers in the cutting area;
- Do not touch the sharp edge of the blade during replacement;
- Do not repair, disassemble, or modify the cutter;
- Do not use on an unstable surface
- Keep out of reach of children;
- Keep out of sight of children.

Recommendations

- Always cut using the cutting mat;
- Remove staples, paper clips, or other metal objects before cutting;
- Do not cut metallic paper or fiberglass;
- Do not repair, disassemble, or modify the cutter;
- Do not cut more sheets than the specified maximum capacity;
- Do not cut adhesive paper;
- Do not expose directly to sunlight, high temperatures, or high humidity.
