

CARL rolling slicer trimming boards

DC-200N

DC-101 DC-102

DC-210 DC-220 DC-230 DC-250

Materials:

- made in metal and ABS anti-shock plastic
- anti-scratch rubber feet

Technical / functional features: see table on next page

Spare parts: see table on next page

Descriptive notes: unique, the new CARL rolling slicer trimming boards use a cutting system based on a rolling cutter moving on an appropriate mat, with excellent results both for thickness and for cutting precision (it is possible to cut also films, fabrics, etc.). For these characteristics the models DC-210, DC-220, DC-230 and DC-250 are mainly appreciated by technical users, while the models DC-101, DC-102, and DC-200N, also thanks to an excellent relation between their performances and their sales prices, are perfectly suitable for every office, where they are appreciated for their lightness and handiness, together with non-common performances and easiness to use.

In addition: It is possible to choose between straight and dashed cut simply by changing the cutter; mat and cutters are fairly long usable and may be simply replaced in a few seconds with the spares, supplied in the standard equipment for the models CARL DC-210, DC-220, DC-230 and DC-250, available upon request for the models DC-101, DC-102 and DC-200N.

A scoring blade is available for all models of CARL paper trimmers.

Safety: CARL trimming boards completely match with the quality standards fixed for machines which must be used, always in maximum safety, in every working place, at home, at school and in the office. Some of them are also marked with GS mark, supplied by TÜV, German certificate body. In the models DC-101 and DC-102 an automatic safety device ensures the cutter is released in the cutting position only, thus avoiding any accidental contact with the blade.

CARL rolling slicer trimming boards, manufactured by CARL MANUFACTURING CO., LTD. - TOKYO, are distributed in Italy exclusively by **BALMA, CAPODURI & C. s.p.a.**, which assures **a good after-sale service too.**
